

VAŠ PARTNER ZA ČISTOĆU I HIGIJENU!

QUALITY ASSURED. ON AND OFF THE LABEL.

The CHSA is the leader association of the cleaning and hygiene industry. They randomly pick manufacturers and distributors, and test their products. Their purpose is to verify the truthfulness of labels.

Testing Papernet, they only found Quality.

The quality described on the label and the real quality of the products inside the box, which are exactly as indicated outside.

Choosing Papernet, you can be certain of what's inside. You can rely on our labels. You can trust our products.

STO NUDIMO

Besplatno savjetovanje

Naš tim stručnjaka uvijek stoji na raspolaganju i pomaže Vam pronaći najisplativija rješenja za vaše poslovanje. Nudimo besplatne savjete i preporuke za optimizaciju svih Vaših higijenskih postupaka.

Brza dostava

Grad Zagreb: Dostava unutar 2 radna dana. Izvan Zagreba: Dostava unutar 2-3 radna dana.

Zašto Odabrati nas?

- 1. Širok asortiman proizvoda
- 2. Ekološka održivost
- 3. Izvrsna korisnička podrška

Makromikro Grupa je sinonim za pouzdanost i kvalitetu. S našom novom divizijom higijenskih rješenja, pružamo vam proizvode vrhunske kvalitete uz iznimnu uslugu. Zatražite ponudu i ostvarite posebne pogodnosti već danas!

SOFIDEL

CLOSE TO OUR CUSTOMERS TO GUARANTEE EFFICIENCY AND QUALITY.

Quality at the centre

Sofidel's logistics strategy is one of the main factors of the quality and sustainability of all its products. Each of the Group companies, together with its plants, is located within a specific area of activity, close to the customers. This makes it possible to optimize transport and therefore CO, emissions. The headquarters, the strategic heart of the Sofidel Group, is located in the province of Lucca, Tuscany.

Good actions bring great results

Protocols based on the highest international standards make Sofidel a safe environment, creating ideal conditions for continuous improvement of all efficiency and quality parameters. The same culture of responsibility and respect for people that leads Sofidel to implement, in every plant, strict hygiene-health self-monitoring procedures.

BRANDS WORLDWIDE

Sofidel has identified the WWF as a first-level, reliable partner thanks to its history, international profile and widely acknowledged prestige. Contact with the environmental organisation was first made in 2007. The Group has been working alongside WWF for over 15 years. In these years of partnership, both in Italy and internationally, the environmental organisation has supported the Group in developing an organic and systematic approach, contributing to the creation of an open, positive and responsible vision of the future.

The United Nations (UN) Global Compact is one of the most important sustainability initiatives in the world, which the Sofidel Group has joined as a "Participating Member" since 10 years. Membership requires companies to embrace, support and implement, in their strategy and within their sphere of influence, a set of core values identified by the so-called Ten Principles on human rights, labour, environment and anti-corruption standards. Moreover, Sofidel is a "Promoting Founder" member of the Global Compact Network Italy Foundation (GCNI Foundation).

HYGENE INNOVATION SUSTAINABILITY

The strength of hygiene

Paper towels, helping to reduce the risk of bacterial transmission, are the most effective hygiene tool*. Washing and drying your hands properly is a small daily gesture, but it represents a great contribution to health and therefore to life. For this reason, Papernet, the Sofidel Group brand in the Away-From-Home sector, promotes the culture of hygiene, with the idea that it is the foundation of a higher quality life.

Beyond performance

Papernet creates innovative products which provide true consumer benefits. A wide range of products that stand out on the market not only for its high hygienic effectiveness. The Away-From-Home assortment is sustainable from procurement to production and end use. This is particularly the case with our Tech Lines, Papernet's high value-added products. Besides being made with superior quality paper, thanks to their technology they solve specific problems such as cloggings, sediments in pipes, bad smells etc.

All-round sustainability

The entire Papernet range is based on the principle of economic, social and environmental sustainability. This is the only way, in the long term, that grants the achievement of the goals of all the entities directly and indirectly involved in the company's business activities. Papernet has always operated with responsible business ethics and management, based on learning and continual improvement of its processes. This approach enables Papernet to be a model in its sector.

* As indicated by the World Health Organisation and a study conducted by the Research Team at the University of Westminster

Scientific Reference Sources

The **World Health Organization** and the prestigious **University of Westminster** recommend the use of paper hand towels, given the substantial reduction of bacteria on hands.

UNIVERSITY OF WESTMINSTER#

Papernet Products Certifications

Bio Tech, in 2012, received the Chelab BATP certification as dermatologically tested product. Chelab Silliker, part of the Mérieux NutriSciences Corporation, boasts a proven expertise in analytical services in chemistry, microbiology and biology with a high technicalscientific specialization. In 2015 Bio Tech received certification by the prestigious SGS Institut Fresenius, Taunusstein (Germany) regarding the beneficial enzyme activity of BATP spores. SGS is the world's leading inspection, verification, testing and certification company in Germany.

The jury of the **2015 edition** of the **PPI Awards** has selected Papernet **Bio Tech**, the biologically active toilet paper, as "Innovative Product of **the Year**". The 2015 PPI Awards is the only global honor dedicated to recognizing the achievements of companies for leadership, vision, innovation and strategic accomplishments within the pulp and paper sector.

Papernet Products Certifications

The **Centre Technique du Papier in Grenoble**, in September 2014, proved the dissolvability of **Dissolve Tech** paper after 3 minutes of contact with water. The Centre Technique du Papier in Grenoble is an industrial research and development organization that provides scientific support to the paper industry.

Dissolve Tech is the 2016 Sanitary Maintenance Distributor Choice Award Winner. The Distributor Choice Award program recognizes the most innovative and useful sanitary supply products of the year, as determined by distributors active in the sanitary supply marketplace, including janitorial, paper, food service, industrial and wholesale.

The jury of the **2019 edition** of the **PPI Awards** has selected Papernet **Freshen Tech** as **"Innovative Product of the Year"**, thanks to its technology that eliminates washroom odours. The 2019 PPI Awards is the only global honor dedicated to recognizing the achievements of companies for leadership, vision, innovation and strategic accomplishments within the pulp and paper sector.

CERTIFICATION ROMES

makromikro GRUPA

Ecolabel is the voluntary Type III ecological label recognised on a European level. It is a stylised daisy with the "E" of Europe at its centre, surrounded by stars representing the Member States. It was created by the European Commission in 1992 as a quality label awarded to product and service categories respecting precise ecological criteria. In particular, it indicates that the product guarantees a reduced environmental impact at every phase of its life cycle. For every product, the environmental aspects connected to its production are taken into consideration: the quality of the air, the water and the soil, waste production, resource and energy consumption, noise pollution, protection of the biodiversity. According to the principle of shared environmental management, the new Ecolabel Regulation 2010 establishes that the criteria adopted by the Commission are proposed by an Ecological Label Committee (CUEME) that sees the participation of all interested parties: Industry and SMEs, Consumer Associations, Environmental Associations. And the attention placed on the entire life cycle allows reducing the overall environmental impact, preventing the mere transfer of impacts from one phase to another. Through the Ecolabel, the consumer has access to reliable and scientifically based information on the products' environmental impact. Additionally, Ecolabel products guarantee effective product quality.

https://ec.europa.eu/environment/ecolabel/

Blue Angel products meet a list of criteria considering environmental and health-related aspects. The purchase of a Blue Angel-labelled product is a guarantee of good products with less environmental impact and greater health protection than many other products serving the same purpose. The main criteria for Tissue Paper is that the raw materials is made by 100% recovered paper (Recycled); in fact, Blue Angel suggests that a paper product made from 100% recycled paper saves the entire raw material required for virgin fibre paper production. Such action does not only contribute to a reduction of the volume of waste but also helps to conserve wood resources.

www.blauer-engel.de

It is the certification system for forests, wood and derived products that ensures that the products come from forests managed pursuant to strict environmental, social and economic standards. The Forest Stewardship Council is the non-profit organization born in Mexico in 1994 and transferred to Bonn in 2003 that issues the certification necessary in order to be able to use the label on the basis of audits performed on the forests where the wood is extracted and in the course of all subsequent production phases, down to the consumer, and that concern environmental and social-ethical aspects. It is a label similar to Type I for the existence of a third certification body. The FSC forest management principles can be summarized in ten points:

Principle #1: Compliance with laws

The Organization shall comply with all applicable laws, regulations and nationally-ratified international treaties, conventions and agreements.

Principle #2: Workers' rights and employment conditions

The Organization shall maintain or enhance the social and economic well-being of workers.

Principle #3: Indigenous peoples' rights

The Organization shall identify and uphold indigenous peoples' legal and customary rights of ownership, use and management of land, territories and resources affected by management activities.

Principle #4: Community relations

The Organization shall contribute to maintaining or enhancing the social and economic well-being of local communities.

Principle #5: Benefits from the forest

The Organization shall efficiently manage the range of multiple products and services of the Management Unit to maintain or enhance long term economic viability and the range of environmental and social benefits.

Principle #6: Environmental values and impact

The Organization shall maintain, conserve and/or restore ecosystem services and environmental values of the Management Unit, and shall avoid, repair or mitigate negative environmental impacts.

Principle #7: Management planning

The Organization shall have a management plan consistent with its policies and objectives and proportionate to scale, intensity and risks of its management activities.

The management plan shall be implemented and kept up to date based on monitoring information in order to promote adaptive management. The associated planning and procedural documentation shall be sufficient to guide staff, inform affected stakeholders and interested stakeholders and to justify management decisions.

Principle #8: Monitoring and assessment

The Organization shall demonstrate that progress towards achieving the management objectives, the impacts of management activities and the condition of the Management Unit, are monitored and evaluated proportionate to the scale, intensity and risk of management activities, in order to implement adaptive management.

Principle #9: High conservation values

The Organization shall maintain and/or enhance the high conservation values in the Management Unit through applying the precautionary approach.

Principle #10: Implementation of management activities

Management activities conducted by or for the Organization for the Management Unit shall be selected and implemented consistent with the Organization's economic, environmental and social policies and objectives, and in compliance with the Principles and Criteria collectively.

PAPER SYNONYMOUS WITH HYGIENE

Papernet pays constant attention to improving the quality of life. This is why we created **Bio Tech**, an exclusive range of products made with paper capable of fighting naturally pathogenic bacteria thanks to Biologically Active Tissue Paper Technology (BATP). The **Bio Tech** range aids in the cleaning of internal pipework, sewerage and downstream wastewater systems.

Naturally occuring 'good bacteria' are sprayed between plys of tissue during the manufacturing process.

In contact with water, the bacteria 'wake-up' and release enzymes which begin the process of biodegradation of organic matter giving a 100% natural deep clean and descale.

Bio Tech also leads to a significant reduction in the bacterial count of some very dangerous strains such as Legionella, Salmonella, Staphylococcus Aureus, Escherichia Coli.

RESPECTS THE ENVIRONMENT

REDUCES CLOGGING

ELIMINATE SMELLS

REDUCES COST IN USE

BIO TECH IS UNIQUE

Bio Tech is the ONLY paper hygiene range that uses Biologically Active Tissue Paper technology.

The innovative range contains **five types of naturally occuring bacteria** which combined help to break down Sugars, Starches, Fats, Plant fibres and even Cellulose...so even the tissue itself is broken down. In contact with water, **the enzymes begin a process called "food antagonism"**.

Once the enzymes have consumed all orgnaic matter in the waste water system, the degrade into ${\rm CO^2}$ and ${\rm H_2O}$ with no impact on the environment.

BIO TECH IS BETTER

Bio Tech is dermatologically tested ensuring it does not affect skin or our bodies' most sensitive areas.

It has been shown that on an urban scale Bio Tech products contribute to improvements in the cleanliness and sanitation of the entire waste water system.

Bio Tech transforms a daily action, such as the use of paper for hygiene, **into a gesture of environmental protection**.

BIO TECH MEANS SAVINGS

Bio Tech's cleaning action reduces the risk of clogging and save costs on maintenance and chemical usage.

ACTIVE PROTECTION AGAINST GERMS AND BACTERIA

The Defend Tech product range is the **culmination** of **Papernet's** continuous research and innovation in **helping to give protection against bacterial transmission**. It is a new approach to supporting everyday hygiene.

A virtuous circle of advanced protection, **created using innovative technologies** to further raise **Papernets hygiene standards within its product range of paper, dispensers, soaps and antibacterial gels.**

DEFEND TECH: A UNIQUE AND INNOVATIVE PRODUCT

The paper products in the **Defend Tech Range** are designed to ensure maximum protection and safety **within commercial** and personal hygiene **environments**.

Folded towels, interfolded toilet paper, innovative UV treated facial tissue, antimicrobial soaps, couch rolls and wiper rolls are essential for daily care and need to be as hygienic as possible. The antibacterial additive within the packaging and/or paper in Papernet Defend Tech range ensures high performance, offering the maximum level of protection against bacterial transmission. Defend Tech dispensers also act as an active barrier against contamination, thanks to the presence of antibacterial agents added to their surface.

DEFEND TECH: CARING FOR THE ENVIRONMENT

Protection for people is paramount to Papernet, as is ensuring we do our upmost to protect our environment. Defend Tech products are **Ecolabel** and **FSC certified**.

REMOVES GERMS AND BACTERIA

MORE HYGIENE ON THE SURFACES

MORE PROTECTION FOR PEOPLE

THE RAPID DISSOLVING TISSUE.

Reduces the cost of clogging.

REDUCES THE RISK OF CLOGGING

Every year over 50% of companies experience issues associated with blockages in their waste water systems.

Recent research has shown that the cost of tackling these issues in Europe exceeds 1 billion Euro.

Papernet solves these problems thanks to a technology in a range of products with excellent performance and rapid break down on contact with agitation and water.

RESPECTS THE ENVIRONMENT

BREAKS DOWN IN CONTACT WITH WATER

PERFORMANT LIKE CONVENTIONAL TISSUE

REDUCES COST IN USE

DISSOLVE TECH IS UNIQUE

Dissolve Tech is an exclusive Papernet range which owes its success to years of scientific research and technological innovation.

Dissolve Tech products are soft and strong but when agitated in water, break down effectively.

Dissolve Tech products have been **scientifically tested** by Research Institutes, (such as the *Center Technique du Papier* in Grenoble and the *Lucca Quality Center*).

DISSOLVE TECH IS BETTER

Dissolve Tech towels, when compared with other conventional towels, **demonstrate strong resistance combined with high levels of absorption**.

If disposed of in the WC, they break down like traditional toilet tissue ensuring no clogs occur.

The use of paper towels is also recommended by the World Health Organisation and institutions such as the University of Westminster, as single use paper towels result in a considerable reduction in bacterial levels on our hands.

Dissolve Tech toilet papers solve the problems of fillings, since they **pulp in less than six seconds**.

DISSOLVE TECH MEANS SAVINGS

High foot-fall locations like Airports, Hospitals, Schools and Factories protect themselves from the risk of out-of-service washrooms at times with large volumes of users using their facilities.

Users with complex waste water systems such as Airplanes, Trains and shipping can avoid service issues and down-time caused by clogging in extremely hard to reach locations.

Using Dissolve Tech products ensures your budget is focused on washroom consumables and not servicing and maintenance costs.

NO COMPROMISE BETWEEN ABSORBENCE AND RESISTANCE

Thanks to an innovative production process, **Dry Tech** products offer up to **100% more absorption capacity and resistance**, compared to traditional paper.

These characteristics ensure end users use less paper which significantly reduces consumption and cost.

Dry Tech products are the perfect product range for all customers requiring high levels of quality.

DRY TECH IS UNIQUE

Dry Tech is the range synonymous with **end user comfort**. The high quality of the raw material ensures the products are **soft and resistant like a fabric, but more hygienic and easily recyclable**.

DRY TECH IS BETTER

The technology used for the production of Dry Tech products offer a range with unrivalled levels of softness, bulkiness and strength.

DRY TECH MEANS SAVINGS

Using Dry Tech products helps **to reduce consumption**, reduce costs and eliminate waste.

Using products which are very soft with high levels of strength and absorption allows for fewer sheets per use leading to an overall reduction in costs.

SUPER ABSORBENT

RESISTANT WITH HIGH PERFORMANCE

CLEANS THOROUGHLY

REDUCES COST IN USE

THE PAPER WITH NO WASTE.

No core rolls up to 150m perfomance.

INFINITE CONVENIENCE

Papernet's continuous attention to improving quality of life translates into the range of **Full Tech** products, which **optimize transport**, storage and refilling, reduces overall costs without sacrificing the **quality**, **quantity** or **performance** of the product.

REDUCES CO; EMISSIONS

UP TO 150 M OF PERFORMANCE

REDUCES THE FREQUENCY OF REFILLING

FULL TECH IS UNIQUE

Full Tech toilet rolls are produced coreless as a solid roll: a Full Tech toilet paper pack with a small footprint can replace up to **40 rolls** of conventional toilet paper.

The Full Tech dispensing system, with double dispensing, allows to have **300 meters of tissue** in a dispenser of just 16x15x33 cm.

The new **Full Tech Monoroll** dispenser is suitable for both rolls and interleaved dispensing.

FULL TECH IS BETTER

Full Tech rolls are wrapped in paper to reduce the impact of the product. **Full Tech toilet paper** is made of **pure cellulose**, coming from certified or controlled sources.

All Full Tech dispensers are antibacterial.

FULL TECH MEANS SAVINGS

The large amount of paper in a small roll means lower costs.

The main benefit derives from the reduction of time to refill: the double Full Tech dispenser can replace up to 20 rolls of conventional toilet paper.

Considering that the replacement of a roll takes about 2 minutes, (including transport times from the warehouse to the washroom), reloading the rolls of Full Tech toilet paper saves over 30 minutes, therefore reducing cost.
